About Us

Makes Associates, established in 2021, is a proprietorship firm promoted by Mr. Elangovan, a Mechanical Engineer with over 35 years of experience in industrial business development across power, oil & gas, petrochemical, and related sectors in India and abroad.

Vision

To become a recognised export company for industrial goods and agricultural products, serving a diverse client base across global markets.

Mission

To deliver products on committed timelines in compliance with customer requirements, applicable standards, and quality expectations.

Values

Ethics first, transparency in every transaction, and consistent commitment to quality and delivery.

More Information

Mechanical Products

Pipe Fittings

IS, ASTM, ANSI and API standard pipe fittings in CS, SS, AS, Al, and Hastelloy, designed for durable and reliable performance in oil & gas, power, and industrial applications.

Available materials

CS

SS

AS

Al

Hastelloy

Flanges

IS, ASTM, ANSI and API standard industrial flanges, including Weld Neck, Socket Weld, and Slip-On types (up to 2500#), ensuring secure, leak-proof connections for high-pressure and high-temperature systems.

Available materials

CS

SS

AS

Al

Hastelloy

Valves

Forged and cast Gate, Globe, Check, and Control valves in CS, SS, AS, Al, Hastelloy and LTCS, rated up to 2500#, ensuring precise flow control and long service life per IS, ASTM, ANSI and API standards.

Available materials

CS

SS

AS

Al

Hastelloy

Mechanical Products

Fasteners

Heavy-duty industrial fasteners—bolts, studs, and anchors—in CS, AS, and SS, available in galvanized and non-galvanized finishes for corrosion-resistant, reliable piping and equipment installations.

Available materials

CS

SS

AS

Gaskets

Premium industrial gaskets—metallic, non-metallic, composite, and exotic—including spiral wound, ring type, and RTJ, ensuring reliable sealing per IS, ASME/API standards.

Available materials

Metallic

Non-Metallic

Composite

Exotic

Insulation

High-efficiency thermal, cold, and acoustic insulation systems in mineral wool and polyurethane foam, with aluminium, SS, or polysulir cladding, compliant with ASTM standards.

Available Types

Thermal

Cold

Aquastic

Mechanical Products

Pipe Supports

Durable pipe supports—shoes, hangers, springs, and clamps—in MS, low-alloy, and stainless steel, engineered for load stability and vibration control per ASTM standards. Designed for long-term reliability, easy installation, and safe performance in demanding industrial and piping applications.

Available Types

Shoe Support

Hanger

Spring Support

Clamp Support

Machinery Spares

Reliable spare parts for compressors, pumps, and industrial equipment ensure smooth operations, consistent performance, reduced downtime, extended equipment life, durability, lower maintenance costs, and dependable long-term industrial productivity in worldwide applications.

Available Spares

Compressor

Pumps

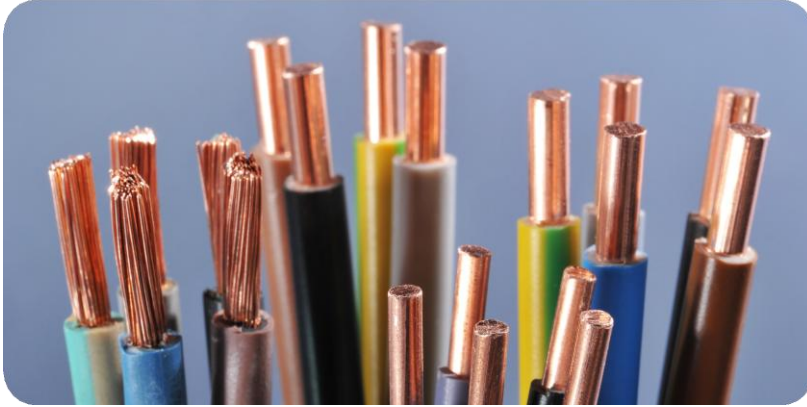

ELECTRICAL PRODUCTS

Power Cables

BS, IEC, IEEE, ISA - standard power cables (LV to EHV up to 440 kV) with copper or aluminium conductors, armoured or unarmoured sheaths, and XLPE/PVC insulation, ensuring safe and reliable power transmission.

Available materials

CU

AL

Optic Fiber

Earth Electrodes

Durable earth electrodes in aluminium, copper, and galvanized materials, providing efficient grounding, corrosion resistance, and reliable long-term electrical safety.

Available materials

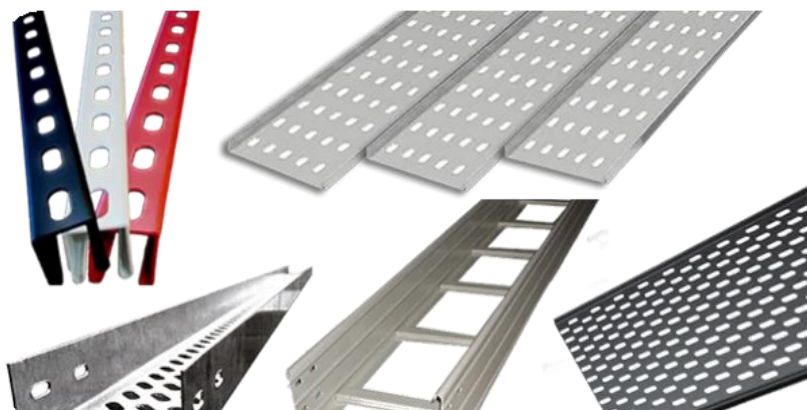

Aluminium

Copper

Galvanized

Cable Trays

Robust cable tray systems—metallic or non-metallic ladder types, with or without covers—designed for organized cable management, mechanical protection, and long-term structural performance.

Available materials

MS

GI

AL

FRP

INSTRUMENTATION PRODUCTS

Instrument Cables

Precision-engineered instrument cables—control, coaxial, and fiber types—with copper or aluminium conductors and PVC insulation, ensuring accurate signal transmission and minimal loss.

Available materials

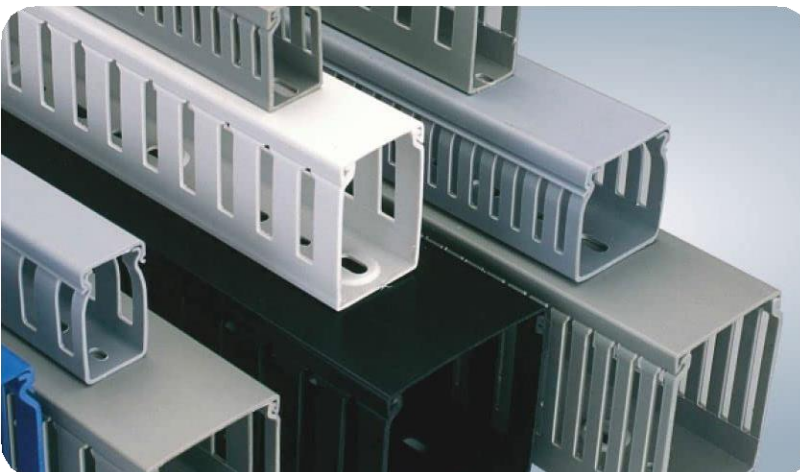

CU

AL

Optic Fiber

Cable Trays

Durable non-metallic cable tray systems engineered for efficient cable management, excellent corrosion resistance, and lightweight installation. Ideal for electrical routing applications requiring insulation, chemical resistance, and long-term performance in harsh environments.

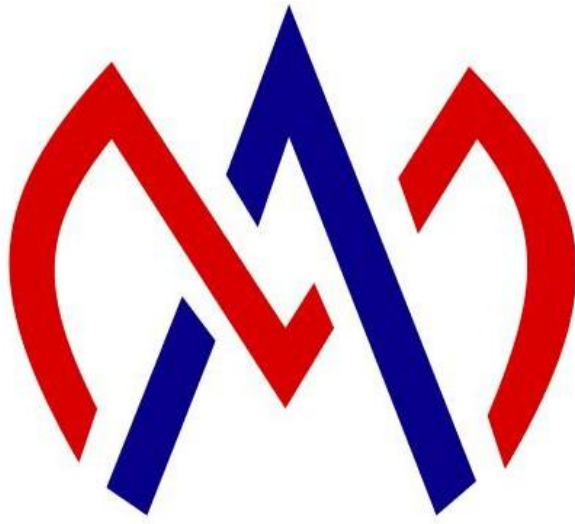

Available materials

Metallic

Non-Metallic
